

01. 공기

Air pollution refers to a phenomenon in which the **air** is made dirty.

02. 대비(하다) ☆

A meeting will be held **in order to prepare** for effects of climate change, such as heavy rain, typhoon damage, etc.

03. 대책 ☆

Residents demanded that **countermeasures** be prepared against air pollutants generated by the nearby factory.

04. 동참(하다)

In order to protect the environment, we **must** all **participate** in the reduction of waste.

05. 마련(하다) ☆

Recently, as fine dust pollution has grown increasingly serious, the government has belatedly **prepared** countermeasures.

EXAM TIP ▲

Aff -책: When combined with a noun, indicates a way (“방책”) of doing something.

- 대비책: A way to “prepare (대비)”
- 대응책: A way to “respond (대응)”
- 지원책: A way to “support (지원)”

These are frequently used with “마련하다” so make sure to remember them!

06. 무한(하다)

Environmental pollution has grown worse due to people who think that the Earth’s resources are **infinite**.

EXAM TIP ▲

Let’s look at forms that appear frequently on exams.

Adv 무한히 infinitely

e.g. 무한히 넓은 우주의 신비에 빠져 버렸다.

I fell into the wonder of the infinitely wide universe.

07. 물질

Carbon dioxide (CO₂) is a major **substance** that causes air pollution.

08. 미세먼지

The number of days is increasing where the sky is hazy not because of clouds but because of **fine dust**.

BACKGROUND KNOWLEDGE ▲

Let’s learn about fine dust, which can be encountered frequently on the news or in newspapers.

Fine dust refers to very small dust that is generated in large amounts by exhaust from factories, cars, etc. Because the particles are much smaller than normal dust, they can get into the deepest parts of the human body and take up to a week to come out, so fine dust has been known to cause a variety of illnesses.

09. 발생(하다) ☆

Toxic substances like fine dust increase the risk of the **occurrence** of lung cancer.

10. 배출(하다)

If we sort our waste before **discharging** it, it can be recycled, so we can reduce waste.

11. 보호(하다) ☆

In order to **protect** the environment, efforts are needed to conserve resources.

12. 수거(하다)

In order to protect the environment, recyclable items are separated from regular waste and then **collected**.

13. 시급(하다)

It is **urgent** for the entire world to prepare measures to prevent environmental pollution.

14. 심각하다

As a result of waste water from factories, the water pollution situation is so **serious** that fish cannot live.

15. 아끼다 ☆

For the future of the Earth, we must try to **conserve** resources and save the environment.

16. 애쓰다

There are many people who are **making an effort** to protect the environment by going into the ocean and picking up garbage, etc.

17. 영향 ☆

Marine litter that is thrown into the oceans has a negative **impact** on the marine environment.

18. 오염

As a result of too many pesticides being sprayed during farming, the soil **pollution** situation is serious.

EXAM TIP ▲

As chances are high that types of pollution will appear in detail in a text about the environment, let's study them.

- 수질오염 Water Pollution:
The phenomenon of water becoming dirty due to household sewage or factory waste water
- 토양오염 Soil Pollution:
The phenomenon of soil becoming dirty due to garbage or pesticides
- 대기오염 Air Pollution:
The phenomenon of air becoming dirty due to car exhaust or smoke from factories
- 해양오염 Marine Pollution:
The phenomenon of oceans becoming dirty due to garbage

19. 위기 ☆

Global **crises** like global warming cannot be solved by the efforts of one country alone.

20. 유해하다

The waste that humans created has returned as substances that are **toxic** to humans, such as fine dust or microplastics.

21. 자원 ☆

The habit of reducing disposable items can reduce the waste of **resources** and prevent environmental pollution.

22. 절약(하다) ☆

If you use the stairs instead of the elevator, you can **save** energy and get some exercise.

23. 지구 ☆

In order to protect the **Earth** that we live on, we must absolutely protect the environment.

24. 참여(하다) ☆

Residents **participated** actively in the volunteer activity of picking up garbage in order to protect the environment.

EXAM TIP ▲

Let's learn the difference between the words “참여,” “참석,” and “참가.”

- 참여: Indicates a **relationship** with some events.

e.g. 이번 올림픽에 외국어 자원봉사자로 참여했다.
I participated in the Olympics as a foreign language volunteer.

- 참석: Like “출석하다,” indicates **participating in something in a position**.

e.g. 20여 개국의 정상들이 이번 올림픽 개막식에 참석할 예정이다.
The leaders of over 20 countries are scheduled to attend the opening ceremony of the Olympics.

- 참가: Usually indicates a **direct connection** with something like a seminar, sports game, meeting, the Olympics, etc.

e.g. 박건우 선수는 올림픽을 앞두고 부상을 당해 이번 올림픽에 참가하지 못하게 되었다.
Athlete Park Geonwu was injured ahead of the Olympics and became unable to participate.

“참여” and “참가” give more of a feeling of being actively related than “참석” does.

25. 처리(하다) ☆

The reason that food waste and recyclables have to be separated is that the method of **handling** them differs depending on what they are.

26. 친환경

Recently, wooden toothbrushes that decompose well in the ground are gaining popularity as **environmentally friendly** products.

BACKGROUND KNOWLEDGE ▲

Let's learn about environmentally friendly products.

“Environmentally friendly products” refers to items that don't pollute or destroy the natural environment and instead work well with it. As consumers become more interested in environmentally friendly products, companies are trying to create an image of being environmentally friendly. In everyday life, personal cups or containers are often used as environmentally friendly products, and many things like “eco-friendly electric buses” and “green homes” are being created.

27. 플라스틱

A company released clothing made with recycled **plastic**.

28. 해결(하다) ☆

In order to solve the problem of household waste, we have to reduce the use of disposable plastics.

29. 현상 ☆

Global warming isn't a natural **phenomenon** but rather something that occurs because of CO₂ emissions from humans.

30. 환경 ☆

Planting trees is the best way that we can protect the **environment** from global warming.

31. 활용(하다) ☆

Artist Jung Hyojun is working on creating artwork **using** household waste that has been thrown away.
